# VCL-30 E1, 2Mbps Multiplexer

Subscriber Loop Application -FXS Interface
Directly Connected to E1 Port (CAS, R2) of a Switch

Central Office / Switch

VCL-30, E1 2 Mbps Multiplexer

E1- CAS, R2 Signaling

1 to 30, FXS Channels

- **Eliminates Central Office / Exchange Terminal and FXO interface**
- **Remote Terminal connects directly to E1 (CAS, R2) port from the Switch**
- **Supports V.90 data modems**
- **No expensive V 5.1 software upgrade required for Switch**
- **Supports digital data interfaces - any *"mix".***
